FOREWORD

First and foremost, all praise is due to God Almighty for His mercy and grace so that I can finish this book well. Even though I faced many obstacles, I am grateful that this book entitled "*ENGLISH MATERIALS FOR PHARMACY STUDY PROGRAM SEMESTER I*" could be completed on time.

The use of English in pharmacy is significant, given that much of the research, guidelines, and literature related to drugs and therapies are written in this language. Mastery of English enables pharmacists and other health workers to access up-to-date information, understand drug labels, and communicate effectively with patients from different backgrounds. In addition, in a globalized environment, English language skills are essential for international collaboration, professional enhancement, and career development in the pharmaceutical industry.

I would like to thank all parties involved who were willing to take part in the process of preparing this book. Without cooperation, I could not have obtained the information in preparing this paper.

As authors, I feel that there are many shortcomings in this book due to our limited knowledge and experience. Therefore, I really hope for constructive criticism and suggestions from readers for the perfection of future papers. I hope is that this paper can increase knowledge and be useful for readers.
